

NEWS OF THE MINING WORLD

ONE OF THE BIGGEST SILVER FINDS EVER MADE IN NEW MEXICO.

Great Resources of the Little-known Central Part of Idaho—A Mexican Mine That One Paid Enormously—The New Process of Treating Ore Where Water is Scarce.

SILVER CITY, N. M., April 4.—The richest silver strike ever made in the western part of this county was made last week in the Jim Crow mine, Piedmont district, near Carlsbad. The mine has been worked in a desultory way for more than two years, but no very rich ore was found until last week, when a new level was reached. Then the character of the ore changed. In two days over \$60,000 worth of ore was taken out. A sample analysis of the ore taken out on the first day ran \$1,631 per ton, and a sample from that taken out the second day ran \$2,042 per ton. The ore is sulphide and is broken up in a porphyry formation. A fair grade of ore was found from the surface down, and a number of shipments have been made from the mine, but up to this time the profits have not been large. If the ore body which has just been discovered is continuous the mine can be worked with the present development at a profit of at least \$1000 per day, and with further development so that a larger force of men can be put at work, the profits can be correspondingly increased. If the lead is continuous from water level down it is the most important discovery ever made in New Mexico.

The Georgetown district in this country, which has produced more silver than any other camp in the Territory, will make a poor showing this year. As soon as the ore now out is cleaned up there will be nothing doing in the camp except development work. Orders have been received to suspend operations in the Minntes Consolidated Company's mines, and the mill will be closed down as soon as the ore now out, which is worth from \$75,000 to \$100,000, is milled. The Parrot mill has been closed down, and there will be little work done in the camp until better prices can be obtained for silver. The Minntes Consolidated Company has not been working the mines to their full capacity for more than a year on account of the low price of silver, and the mines will not be started up again unless an silver remains below a certain amount.

Ten stamps of the Silver City mill will be started up in a few days. Five stamps will be run on gold and five on ore from the Alabama mine, which has to be treated in pans and sifters.

The Standard mill at Hillsborough has just been started up on ore from the Snake mine. Twenty stamps are in operation. The mine is in excellent condition and from twenty to thirty tons of ore are being milled daily. The Hillsborough Smelting Company has ordered 2,000 tons of coke and it is expected that the smelter will be in operation in a few weeks. Like the Anson S. Smelter at Hanover, it will treat copper ores only.

Two gold bricks were shipped from the Bell & Stephens mill at Piney Altos on Saturday. One of the bricks, valued at \$1,000, was from ore from the Santa Rosalia mine, and the other came from ore from the Pacific extension.

The Mammoth mill, which is but a short distance from the Bell & Stephens mill, has been started up on ore from the Snake mine. Twenty stamps are in operation. The mine is in excellent condition and from twenty to thirty tons of ore are being milled daily. The Hillsborough Smelting Company has ordered 2,000 tons of coke and it is expected that the smelter will be in operation in a few weeks. Like the Anson S. Smelter at Hanover, it will treat copper ores only.

The Hillsborough Smelting Company has ordered 2,000 tons of coke and it is expected that the smelter will be in operation in a few weeks. Like the Anson S. Smelter at Hanover, it will treat copper ores only.

The Pacific Gold Company has had some trouble in getting water enough for the mill here, and the mill was closed down for a few days while the tunnel was being cleaned out. It is in operation again. Both the Aztec and Bremen mills are idle, and the Flager Works have been closed down for several months. Some time ago it was reported that they would be started up again, but there are no indications that anything will be done there soon.

Work has been resumed on the Colton mill, and there is a probability that it will be completed this summer. It was commenced and then abandoned, and the financial difficulties presented themselves, and work on the plant had to be discontinued. When it is completed it will be one of the largest mills in the territory.

THE INDUSTRY IN MEXICO.

MONTEZUMA, Mex., April 9.—Much development is being done in the mines of Zacatecas, and in the last few months the value of the average at mining properties of importance. First of these is the Sonora Mining Company's mines. This property is a large one, and the output is increasing rapidly, and containing from 200 to 300 tons of silver and gold per month.

Another company, the Aztec Tunneling and Milling Company, has been organized at Mason, with a capital stock of \$100,000.00. The object of the company is to run a tunnel 12½ miles through the mountains, and to open up a vein of silver and gold, and containing from 200 to 300 tons of silver and gold per month.

The Aztec Tunneling and Milling Company has been organized at Mason, with a capital stock of \$100,000.00. The object of the company is to run a tunnel 12½ miles through the mountains, and to open up a vein of silver and gold, and containing from 200 to 300 tons of silver and gold per month.

The Aztec Tunneling and Milling Company has been organized at Mason, with a capital stock of \$100,000.00. The object of the company is to run a tunnel 12½ miles through the mountains, and to open up a vein of silver and gold, and containing from 200 to 300 tons of silver and gold per month.

Another company, the Aztec Tunneling and Milling Company, has been organized at Mason, with a capital stock of \$100,000.00. The object of the company is to run a tunnel 12½ miles through the mountains, and to open up a vein of silver and gold, and containing from 200 to 300 tons of silver and gold per month.

Another company, the Aztec Tunneling and Milling Company, has been organized at Mason, with a capital stock of \$100,000.00. The object of the company is to run a tunnel 12½ miles through the mountains, and to open up a vein of silver and gold, and containing from 200 to 300 tons of silver and gold per month.
